

HealthHub Component Inventory

Multi-Tenant Telemedicine Application (Angular)

Version: 1.0

Date: January 13, 2026

Platform: Web (Angular 17+)

Design System: Dark Theme Healthcare

Design System Foundation

Color Palette

Token	Hex	Usage
--bg-primary	#0B0F14	Main background, page surfaces
--bg-secondary	#121826	Cards, modals, form containers
--bg-gradient	linear-gradient(180deg, #0B0F14, #121826)	Landing page hero
--text-primary	#FFFFFF	Headlines, primary text
--text-secondary	#A0AEC0	Subtitles, descriptions
--accent-primary	#10B981	CTAs, success states, HealthHub brand green
--accent-secondary	#3B82F6	Links, interactive elements
--error	#EF4444	Error states, critical alerts
--warning	#F59E0B	Warning states, pending
--border	#1E293B	Card borders, dividers

Typography Scale

Level	Size (Desktop)	Size (Mobile)	Weight	Line Height
H1	32px	24px	700	1.2
H2	24px	20px	600	1.3
H3	18px	16px	600	1.4
Body	16px	14px	400	1.5
Caption	14px	12px	400	1.4
Small	12px	11px	400	1.3

Logo Specifications

Context	Size	Variant
Landing Page	80-96px	Full logo (icon + wordmark)
Page Headers	28-32px	Logo mark only (small)
Favicon	32px / 16px	Icon only

Icon Sources

- **Primary:** Untitled UI Icons
- **Secondary:** SVG Repo, Flaticon
- **Style:** Outline (2px stroke), consistent 24px grid

Screen 1: Landing / Login & Signup (Entry Page)

Structured Inventory

Screen Name: LandingPageComponent

Route: / or /welcome

💡 Gap Analysis (Missing Pieces)

- 1. Loading State:** What happens while the gradient background image loads? Should there be a solid color fallback or skeleton?
- 2. Language Persistence:** When user selects a language, is it stored in localStorage or a cookie? What's the default language detection logic (browser locale)?
- 3. Responsive Breakpoints:** At what screen width does the logo move from top-left to top-center? (Suggest: < 768px)
- 4. Animation/Transitions:** Should the hero section have entrance animations? What's the behavior on scroll if features section exists?

5. **Deep Link Handling:** If user arrives with `?redirect=/consult`, should we preserve this after login/signup?

Reusability Check

Component	Scope	Notes
AppLogoComponent	SHARED	Used across ALL pages with size variants
AppButtonComponent	SHARED	Core button with variants (primary, outline, ghost)
GradientBackgroundDirective	SHARED	Can be applied to any container
LanguageToggleComponent	SHARED	Persistent across all pages in header
HeroSectionComponent	PAGE-SPECIFIC	Only for landing page
FeaturePreviewCardComponent	PAGE-SPECIFIC	Landing only, but pattern reusable

Screen 2: Login Page

Structured Inventory

Screen Name: LoginPageComponent

Route: /login

```

PAGE WRAPPER
  [Background] ← solid #0B0F14

HEADER
  [Logo] → AppLogoComponent
    @Input: size = 'small' (32px)
    @Input: variant = 'mark' (icon only)

  [Language Toggle] → LanguageToggleComponent

LOGIN CARD
  [Card Container] → AuthCardComponent
    Background: #121826
    Border-radius: 16px
    Padding: 32px

    [Card Header]
      [Title] ← "Welcome Back" (H2)
      [Subtitle] ← "Login to your account"

    [Login Form] → LoginFormComponent
      [Username/Phone Input] → AppInputComponent
        @Input: type = 'text'
        @Input: label = 'Phone or Email'
        @Input: icon = 'mail' | 'phone'
        @Input: placeholder
        @Input: errorMessage

      [Password Input] → PasswordInputComponent
        @Input: label = 'Password'
        @Input: icon = 'lock'
        [Toggle Visibility] → Eye icon (show/hide)
        @Input: errorMessage

      [Remember Me] → CheckboxComponent
        @Input: label = 'Remember me'

      [Forgot Password Link] → TextLinkComponent
        @Output: clicked → navigate('/forgot-password')

      [Submit Button] → AppButtonComponent
        @Input: variant = 'primary'
        @Input: fullWidth = true
        @Input: loading (for submit state)
        Text: "Login"

      [Signup Redirect]
        [Text + Link] ← "Don't have an account? Sign up"

ERROR/SUCCESS TOAST
  [Toast Container] → ToastComponent
    @Input: type = 'error' | 'success'
    @Input: message

FOOTER (minimal)
  [Footer Links] → MinimalFooterComponent

```

Gap Analysis (Missing Pieces)

1. **OTP Login Option:** User clarifications mention phone login. Is there an OTP-based login flow? If yes, what's the UI for "Send OTP" and verification code entry?
2. **Loading State:** What happens when login is processing?
 - Button shows spinner?
 - Full-page overlay?
 - Input fields disabled?
3. **Error States:**
 - Invalid credentials → Where does error show? (Inline vs toast)
 - Account locked → Special message?
 - Network error → Retry option?
4. **Forgot Password Flow:** Does clicking "Forgot Password" open:
 - A new page (`/forgot-password`)?
 - A modal overlay?
 - What fields: Email only, or Phone option too?
5. **Social Login:** Are there OAuth options (Google, Apple)? Not mentioned but common in healthcare apps.

Reusability Check

Component	Scope	Notes
AppInputComponent	SHARED	Core text input with icon support
PasswordInputComponent	SHARED	Input with visibility toggle (extends AppInput)
CheckboxComponent	SHARED	Form checkbox with label
TextLinkComponent	SHARED	Styled text link
AuthCardComponent	SHARED	Used in Login, Signup, Forgot Password
ToastComponent	SHARED	Global notification system
LoginFormComponent	PAGE-SPECIFIC	Login-specific form logic

Screen 3: Signup Page

Structured Inventory

Screen Name: SignupPageComponent

Route: /signup

```

PAGE WRAPPER
  [Background] solid #0B0F14

HEADER
  [Logo] → AppLogoComponent
    @Input: size = 'small' (32px)
  [Language Toggle] → LanguageToggleComponent

SIGNUP CARD
  [Card Container] → AuthCardComponent
    Background: #121826

    [Card Header]
      [Title] → "Create Account" (H2)
      [Subtitle] → "Join HealthHub today"

    [Signup Form] → SignupFormComponent

      [Name Section]
        [First Name] → AppInputComponent **(REQUIRED)**
          @Input: icon = 'user'
          @Input: required = true

        [Last Name] → AppInputComponent **(OPTIONAL)**
          @Input: required = false

        [Phone Number] → PhoneInputComponent **(OPTIONAL)**
          @Input: icon = 'phone'
          Country code selector
          @Input: required = false

        [Age] → AppInputComponent **(OPTIONAL)**
          @Input: type = 'number'
          @Input: min = 1, max = 120

        [Gender] → SelectComponent **(OPTIONAL)**
          @Input: options = ['Male', 'Female', 'Other', 'Prefer not to say']
          @Input: placeholder = 'Select gender'

        [Email] → AppInputComponent **(REQUIRED)**
          @Input: type = 'email'
          @Input: icon = 'mail'
          @Input: required = true

        [Password] → PasswordInputComponent **(REQUIRED)**
          @Input: showStrengthIndicator = true
          [Password Strength] → PasswordStrengthComponent

        [Confirm Password] → PasswordInputComponent **(REQUIRED)**
          Validation: must match password

        [Terms Checkbox] → CheckboxComponent
          Label: "I agree to Terms & Privacy Policy"

      [Submit Button] → AppButtonComponent
        @Input: variant = 'primary'
        @Input: fullWidth = true
        Text: "Create Account"

      [Login Redirect]
        [Text + Link] → "Already have an account? Login"

```

Gap Analysis (Missing Pieces)

1. Field Validation:

- Email format validation → When does it trigger? (onBlur, onChange, onSubmit)
- Password requirements → What are the rules? (min length, special chars?)
- Phone format validation for different countries?

2. Email Verification:

- After signup, is there an email verification flow?
- If yes, what's the intermediate screen? "Check your email" page?

3. Error Handling:

- Email already exists → Inline error or redirect to login with prefill?
- Phone already registered → Same question
- Network error during submission?

4. Progress Indicator:

- Is signup a multi-step wizard or single form?
- If single form is long, should there be a progress bar?

5. Back Navigation:

- "Back to Login" visible at top or only at bottom?

Reusability Check

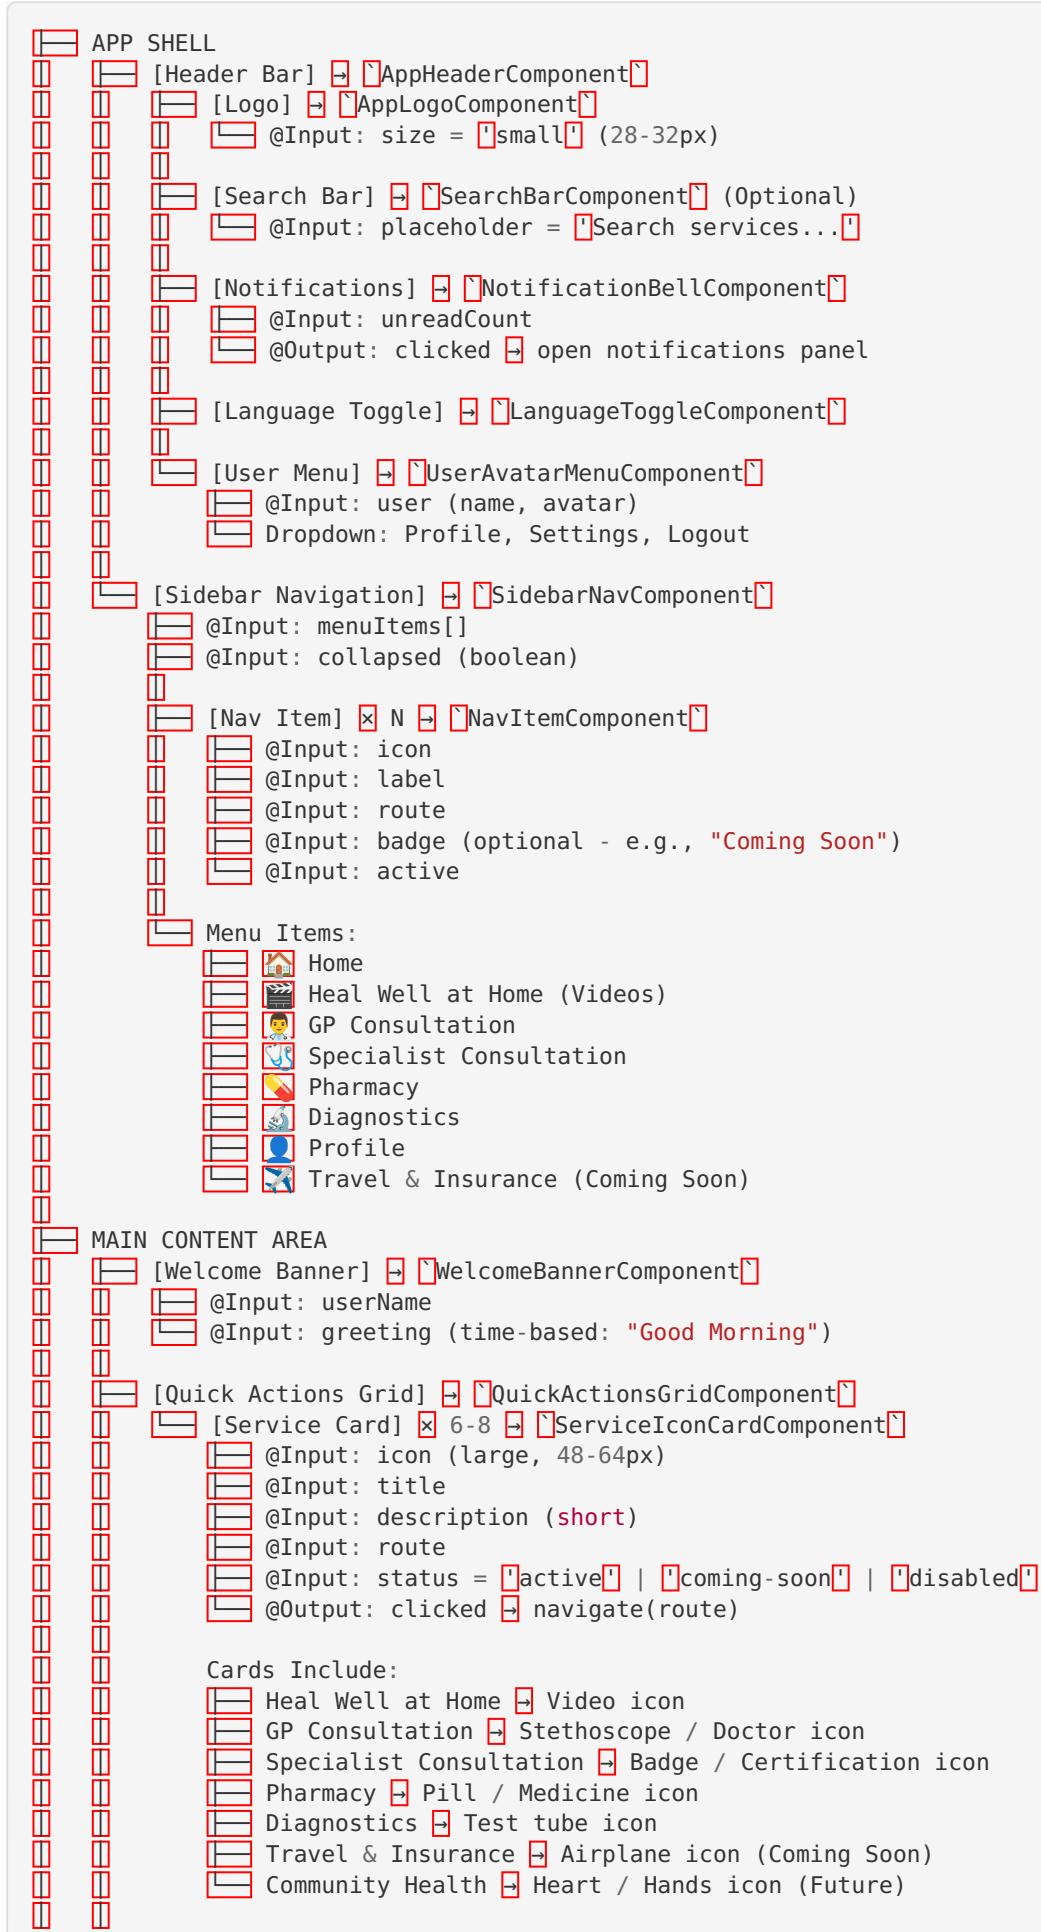

Component	Scope	Notes
PhoneInputComponent	SHARED	Phone input with country code picker
SelectComponent	SHARED	Dropdown select with options
PasswordStrengthComponent	SHARED	Visual password strength indicator
SignupFormComponent	PAGE-SPECIFIC	Signup-specific validation logic

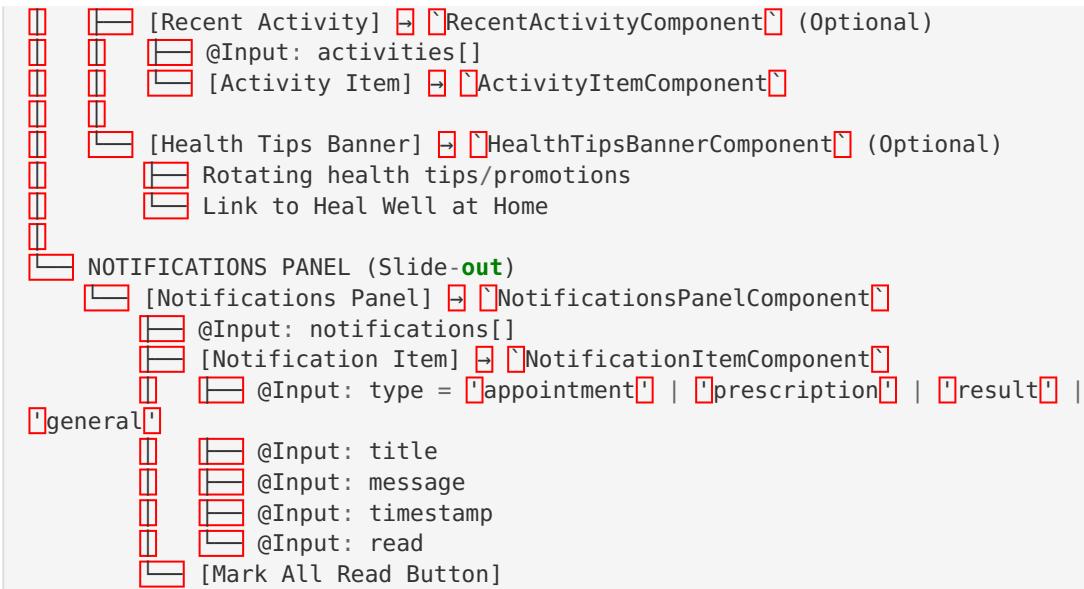

Screen 4: Home Page (Dashboard)

Structured Inventory

Screen Name: HomePageComponent

Route: /home or /dashboard

🕵️ Gap Analysis (Missing Pieces)

1. Sidebar Behavior:

- Is sidebar always visible on desktop, collapsible on mobile?
- Does it overlay or push content on mobile?
- Collapsed state: icons only or completely hidden?

2. Loading States:

- What shows while user data loads? (Skeleton cards?)
- What if services list takes time to load?

3. Empty States:

- New user with no recent activity → What displays?
- No notifications → “All caught up” message?

4. Card Interaction:

- Hover effects on service cards?
- “Coming Soon” cards → Clickable to show info modal, or disabled?

5. Notifications:

- Real-time updates via WebSocket or polling?
- Notification sound/vibration option?
- Maximum notifications shown before “View All”?

Reusability Check

Component	Scope	Notes
App HeaderComponent	SHARED	Global header for all authenticated pages
Sidebar Nav Component	SHARED	Main navigation for all pages
NavItem Component	SHARED	Individual nav item
Notification Bell Component	SHARED	Header notification icon with badge
Notifications Panel Component	SHARED	Slide-out panel for notifications
Service Icon Card Component	SHARED	Reusable card pattern for features
Welcome Banner Component	PAGE-SPECIFIC	Home page only
Quick Actions Grid Component	PAGE-SPECIFIC	Home page only

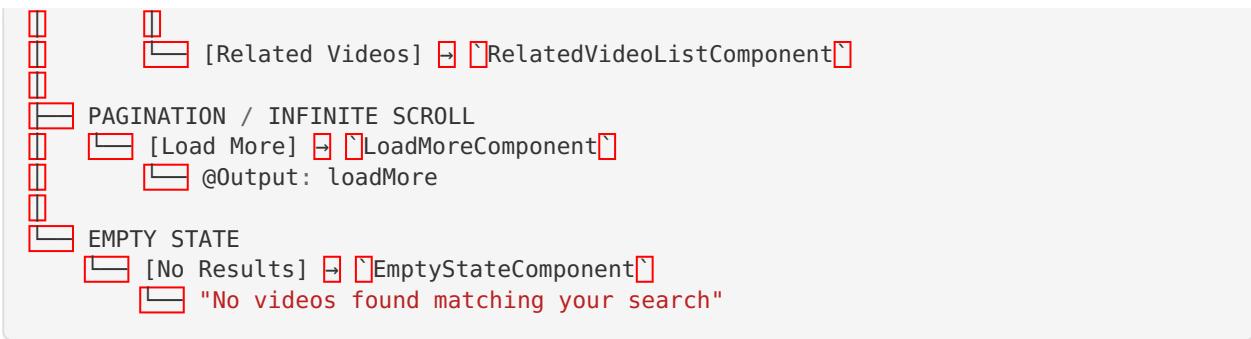

Screen 5: Heal Well at Home (Video Content/Education)

Structured Inventory

Screen Name: HealWellAtHomeComponent

Route: /heal-well-at-home

Gap Analysis (Missing Pieces)

1. Video Loading:

- What shows while video thumbnails load? (Skeleton or placeholder image?)
- What if video fails to load? (Error state with retry)

2. Pagination Strategy:

- Infinite scroll or paginated “Load More” button?
- How many videos per page/batch? (Suggest: 12-15)

3. Search Behavior:

- Debounce timing on search input? (300-500ms)
- Search across title, description, or tags?
- “No results” state with suggestions?

4. Video Player:

- In-page modal or full-screen page?
- Save playback position for “Continue Watching”?
- Quality selection for slow connections?

5. Content Categories:

- Are categories fetched from API or hardcoded?
- Can user filter by multiple categories simultaneously?

Reusability Check

Component	Scope	Notes
BreadcrumbComponent	SHARED	Navigation breadcrumbs
SearchBarComponent	SHARED	Search input with icon
FilterPillGroupComponent	SHARED	Horizontal filter tags
FilterPillComponent	SHARED	Individual filter tag
VideoCardComponent	SHARED	Video thumbnail card (could be used elsewhere)
VideoPlayerComponent	SHARED	HTML5 video player wrapper
VideoPlayerModalComponent	PAGE-SPECIFIC	Modal context for video
EmptyStateComponent	SHARED	Generic empty state with message/action

Screen 6: GP Consultation

Structured Inventory

Screen Name: GPConsultationComponent

Route: /gp-consultation

```

  └─ APP SHELL (Header + Sidebar - inherited)
    └─ PAGE HEADER
      └─ [Breadcrumb] → ConsultWaitingComponent
      └─ [Page Title] → "GP Consultation" (H1)

  └─ STATE: NON-ACTIVE (Waiting/Queue)
    └─ [Waiting State Container] → ConsultWaitingComponent
      └─ Background: #0B0F14

      └─ [Status Card] → ConsultStatusCardComponent
        └─ [Doctor Icon] → Disabled/Grey state
        └─ Icon: Doctor silhouette (muted)

      └─ [Waiting Status] → StatusIndicatorComponent
        └─ [Clock Icon] → Animated/pulsing
        └─ Text: "Waiting for doctor...""
        └─ @Input: status = 'waiting' | 'connecting' | 'connected'

      └─ [Queue Position] → QueuePositionComponent
        └─ @Input: position
        └─ @Input: estimatedWaitTime

      └─ [Info Message] → InfoBannerComponent
        └─ [Info Icon]
        └─ Text: "A doctor will connect with you shortly"

      └─ [Cancel Button] → AppButtonComponent
        └─ @Input: variant = 'outline'
        └─ Text: "Cancel & Return Home"

  └─ STATE: ACTIVE (In Consultation)
    └─ [Active Consult Container] → ConsultActiveComponent
      └─ Background: #0B0F14

      └─ [Video Section - Left] → ConsultVideoSectionComponent
        └─ Width: ~65-70% on desktop

        └─ [Video Container] → VideoCallComponent
          └─ [Remote Video] → Doctor's video feed
          └─ Fallback: Placeholder avatar if video off

        └─ [Self Video] → SelfVideoPreviewComponent
          └─ Small PiP in corner

      └─ [Video Controls Bar] → VideoControlsComponent
        └─ [Video Toggle] → IconButtonComponent
          └─ Icon: Video camera (on/off states)
          └─ @Output: toggleVideo

        └─ [Audio Toggle] → IconButtonComponent
          └─ Icon: Microphone (on/off states)
          └─ @Output: toggleAudio

        └─ [End Call] → IconButtonComponent
          └─ Icon: Phone (hang up)
          └─ @Input: variant = 'danger'
          └─ @Output: endCall

        └─ [Screen Share] → IconButtonComponent (Optional)

    └─ [Chat Section - Right] → ConsultChatSectionComponent

```

💡 Gap Analysis (Missing Pieces)

1. Connection States:

- What shows during WebRTC connection establishment?
- What if video connection fails? (Audio-only fallback?)
- Reconnection logic if connection drops?

2. Audio-Only Mode:

- What's the UI when video is disabled by choice?
- Doctor avatar + audio waveform animation?

3. File Attachments:

- Max file size? File type restrictions?

- Upload progress indicator?
- Preview before sending?

4. Timer Behavior:

- Warning at 2-minute mark?
- What happens when time expires? Auto-end or grace period?
- How is 25-min referral extension communicated?

5. Prescription Flow:

- When does prescription appear in chat?
- Can patient view prescription before call ends?
- QR code: is it scannable directly from screen?

Reusability Check

Component	Scope	Notes
VideoCallComponent	SHARED	Used in GP and Specialist consults
VideoControlsComponent	SHARED	Video/audio controls
ChatMessagesComponent	SHARED	Chat interface (reuse in any messaging)
ChatBubbleComponent	SHARED	Individual message
ChatInputComponent	SHARED	Text input with attachments
ConsultTimerComponent	SHARED	Timer for consultations
PrescriptionPreviewCardComponent	SHARED	Rx preview in chat/profile
StarRatingComponent	SHARED	Rating input
ConsultWaitingComponent	PAGE-SPECIFIC	GP consultation waiting UI
ConsultActiveComponent	PAGE-SPECIFIC	GP consultation active UI

Screen 7: Specialist Consultation (SP)

Structured Inventory

Screen Name: SpecialistConsultationComponent

Route: /specialist-consultation

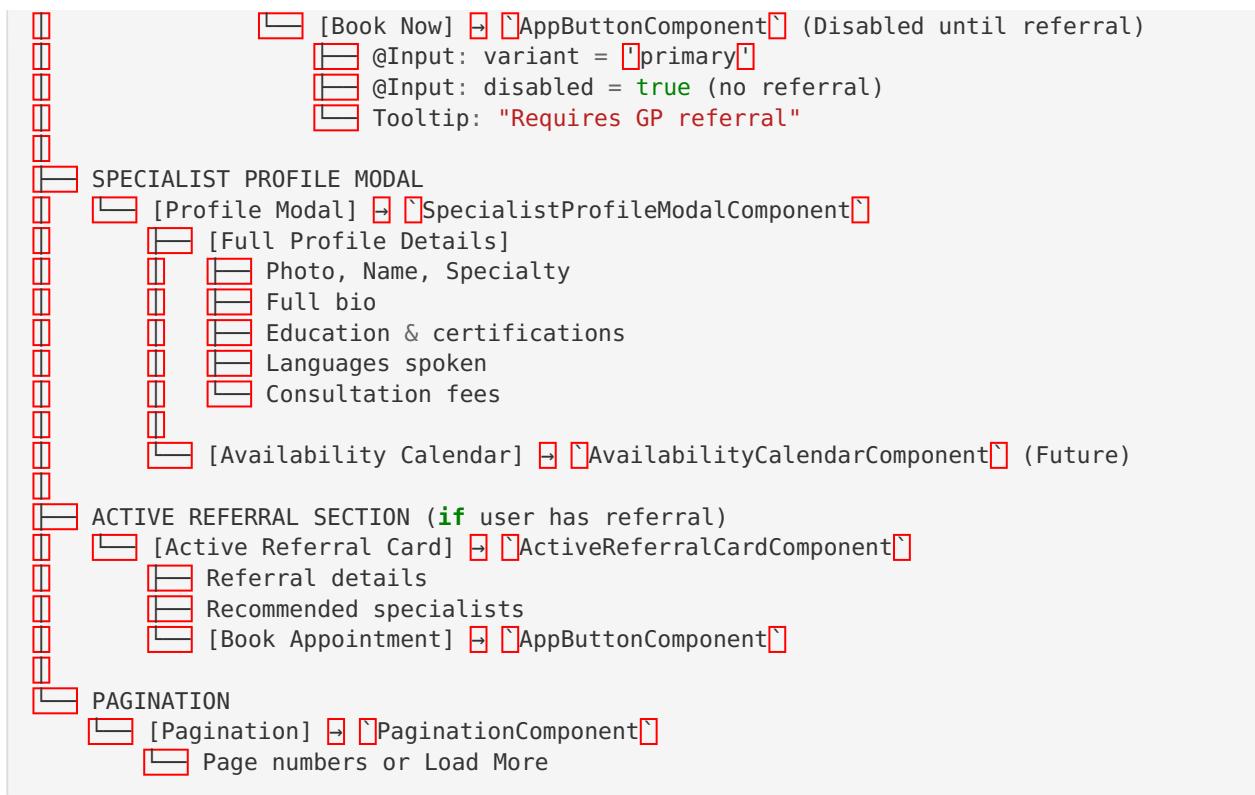

```

  └─ APP SHELL (Header + Sidebar - inherited)
    └─ PAGE HEADER
      └─ [Breadcrumb] → BreadcrumbComponent
      └─ [Page Title] → "Specialist Consultation" (H1)

    └─ INFO BANNER (Referral Required)
      └─ [Alert Banner] → AlertBannerComponent
        └─ @Input: type = 'info' | 'warning'
        └─ Icon: Info circle
        └─ Message: "Specialists are available via GP referral. You can browse our specialist roster below, and direct booking will be available soon."
    └─ SEARCH & FILTER SECTION
      └─ [Search Bar] → SearchBarComponent
        └─ @Input: placeholder = "Search specialists by name or specialty..."
      └─ [Filter Section] → FilterSectionComponent
        └─ [Specialty Filter] → SelectComponent
          └─ Options: All, Cardiology, Pulmonology, Neurology, etc.
        └─ [Language Filter] → SelectComponent
          └─ Options: English, Swahili, Hindi, etc.
        └─ [Availability Filter] → SelectComponent (Future)
          └─ Options: Any, Today, This Week

    └─ SPECIALISTS GRID
      └─ [Specialists Grid] → SpecialistsGridComponent
        └─ [Specialist Card] × N → SpecialistCardComponent
          └─ [Profile Section]
            └─ [Avatar/Photo] → AvatarComponent
              └─ @Input: size = 'large'
            └─ [Name] → H3
            └─ [Specialty] → Badge/Tag
          └─ [Credentials Section]
            └─ [Certification Badge] → BadgeComponent
              └─ Icon: Certification/Shield
              └─ Text: "Board Certified"
          └─ [Experience] → IconTextComponent
            └─ Icon: Briefcase / Star
            └─ Text: "15 years experience"
          └─ [Rating] → StarRatingDisplayComponent
            └─ @Input: rating = 4.8
            └─ @Input: reviewCount = 120
          └─ [Languages] → IconTextComponent
            └─ Icon: Globe / Language
            └─ Text: "English, Hindi"
          └─ [Availability Indicator] → AvailabilityBadgeComponent
            └─ @Input: status = 'Available' | 'busy' | 'offline'
            └─ Icon: Calendar
          └─ [Action Buttons]
            └─ [View Profile] → AppButtonComponent
              └─ @Input: variant = 'outline'

```

💡 Gap Analysis (Missing Pieces)

1. Referral State Management:

- How does page know if user has active referral?
- Different UI when referral exists vs. browsing only?
- Link to "Get a referral via GP" CTA?

2. Booking Flow:

- When referral exists, what's the booking flow?
- Time slot selection UI?
- Confirmation step before booking?

3. Doctor Availability:

- Real-time availability or cached?
- What shows when no specialists available in a category?
- Time zone handling for appointment times?

4. Filter Persistence:

- Do filters persist on page reload?
- URL query params for shareable filtered views?

5. Loading States:

- Skeleton cards while specialists load?
- What if search returns zero results?

Reusability Check

Component	Scope	Notes
AlertBannerComponent	SHARED	Info/warning banners
SpecialistCardComponent	SHARED	Doctor card (also useful in search results)
AvatarComponent	SHARED	User/doctor avatars
BadgeComponent	SHARED	Status badges
StarRatingDisplayComponent	SHARED	Read-only star rating
AvailabilityBadgeComponent	SHARED	Online/available status
PaginationComponent	SHARED	Page navigation
SpecialistsGridComponent	PAGE-SPECIFIC	Grid layout for this page
SpecialistProfileModalComponent	PAGE-SPECIFIC	Full profile modal

Screen 8: Pharmacy

Structured Inventory

Screen Name: PharmacyComponent

Route: /pharmacy

💡 Gap Analysis (Missing Pieces)

1. QR vs PDF Conflict:

- Clear messaging about QR disabled after PDF download?
- Confirmation dialog before PDF download warning about QR?
- What if user accidentally downloads PDF but wanted QR?

2. Pharmacy Selection:

- Can user select a pharmacy from list to "claim" prescription?
- Or is it purely informational (go to pharmacy, scan QR)?

3. Map Integration:

- What map provider? (Google Maps, OpenStreetMap, Mapbox?)
- Fallback if map fails to load?
- Map markers clickable to show pharmacy details?

4. Prescription History:

- How far back does history go?

- Pagination for large prescription lists?
- Download all prescriptions as ZIP?

5. Future: Online Ordering:

- UI placeholders for “Order Online” feature?
- Price display at checkout mentioned - any preview now?

Reusability Check

Component	Scope	Notes
TabBarComponent	SHARED	Tab navigation
PrescriptionCardComponent	SHARED	Used in Pharmacy and Profile
MedicationItemComponent	SHARED	Medication display
StatusBadgeComponent	SHARED	Status indicators
QRCodeComponent	SHARED	QR code renderer
LocationSearchComponent	SHARED	Location input with GPS
PharmacyCardComponent	SHARED	Pharmacy info card
DateRangePickerComponent	SHARED	Date range selection
PharmacyMapComponent	PAGE-SPECIFIC	Map for pharmacy finder
PrescriptionsListComponent	PAGE-SPECIFIC	Prescriptions tab content

Screen 9: Diagnostics

Structured Inventory

Screen Name: DiagnosticsComponent

Route: /diagnostics

Gap Analysis (Missing Pieces)

1. Referral-Based Booking:

- Flow when user has referral with diagnostic tests?
- Pre-populated tests from referral?
- Lab selection constrained by referral?

2. Home Collection:

- Scheduling UI for home collection?
- Address input and time slot selection?
- Collection fee display?

3. Result Upload:

- Push notification when results ready?
- Auto-fetch from lab via API or manual upload by lab?
- Result highlighting for abnormal values?

4. Payment:

- Payment at lab or online prepayment?
- Price display before booking?

5. Integration with Health Locker:

- Auto-add results to Health Locker?
- Option to exclude from record?

Reusability Check

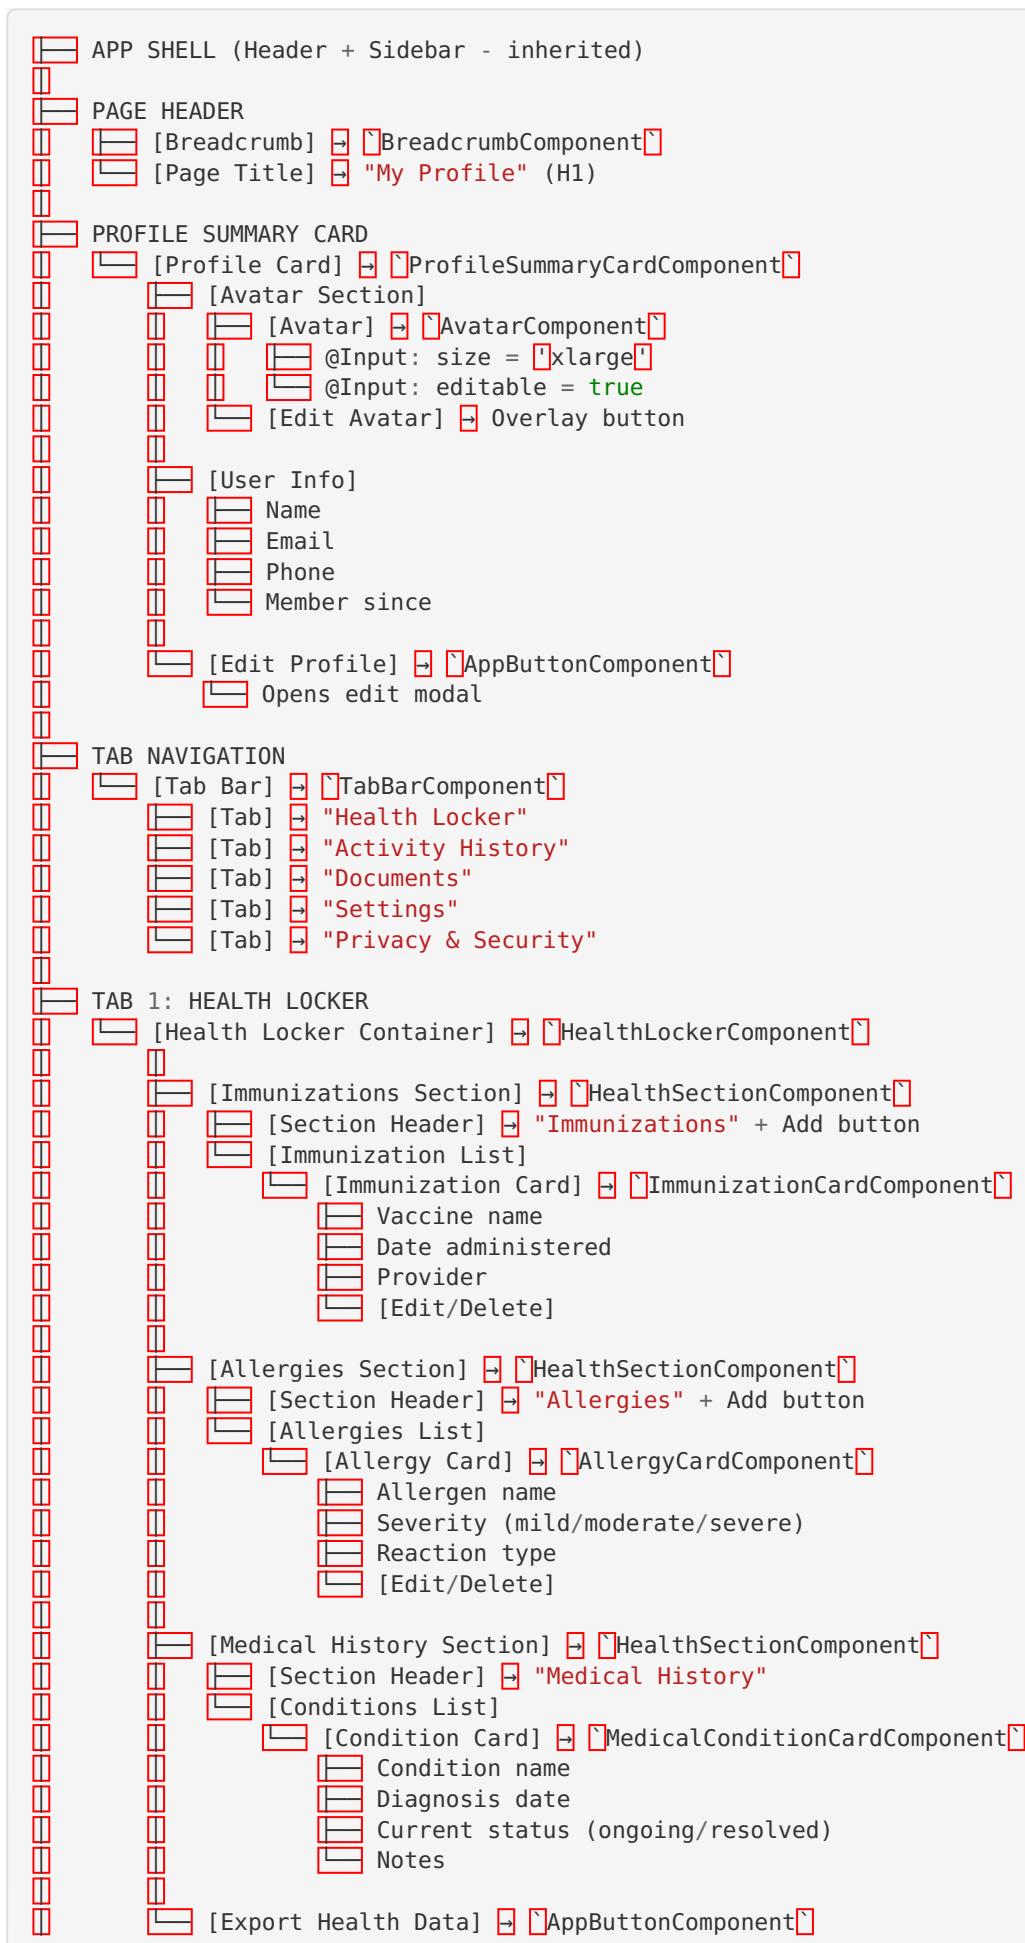

Component	Scope	Notes
DiagnosticPartnerCardComponent	SHARED	Partner/lab display card
LabOrderCardComponent	SHARED	Order tracking card
LabResultCardComponent	SHARED	Result display card
PDFViewerComponent	SHARED	PDF viewer (results, prescriptions)
TestCatalogModalComponent	PAGE-SPECIFIC	Test listing modal
LabResultViewerModalComponent	PAGE-SPECIFIC	Full result viewer

Screen 10: Profile Page

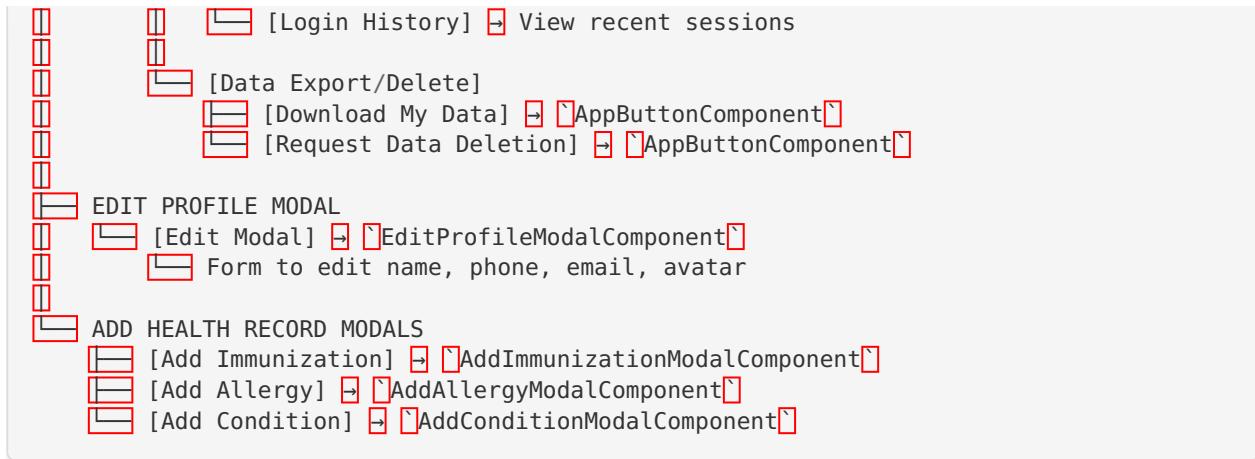

Structured Inventory

Screen Name: ProfilePageComponent

Route: /profile

Gap Analysis (Missing Pieces)

1. Health Locker Sync:

- Auto-populate from consultations and lab results?
- Manual entry vs. imported data distinction?
- Verification status for imported records?

2. Document Upload:

- Max file size? (Suggest: 10MB)
- OCR for extracting data from uploaded documents?
- Categorization: manual or auto-detect?

3. Activity History Depth:

- How far back? Unlimited or time-limited?
- Pagination for large history?
- Export activity log?

4. Data Portability:

- Export format? (PDF summary, FHIR, JSON?)
- Time to generate export?
- Notification when export ready?

5. Delete Account Flow:

- Confirmation steps? (Enter password, reason, confirmation)
- Data retention period after deletion?
- What happens to prescriptions already sent to pharmacies?

Reusability Check

Component	Scope	Notes
ProfileSummaryCardComponent	SHARED	User profile display
HealthSectionComponent	SHARED	Collapsible health data section
ImmunizationCardComponent	SHARED	Vaccine record card
AllergyCardComponent	SHARED	Allergy record card
TimelineComponent	SHARED	Generic timeline display
FileUploadComponent	SHARED	Drag & drop file upload
DocumentCardComponent	SHARED	File/document display card
SettingsSectionComponent	SHARED	Settings grouping
SettingsRowComponent	SHARED	Individual setting row
ToggleSwitchComponent	SHARED	On/off toggle
HealthLockerComponent	PAGE-SPECIFIC	Health locker container
ActivityHistoryComponent	PAGE-SPECIFIC	Activity timeline container

Screen 11: Travel & Insurance (Coming Soon)

Structured Inventory

Screen Name: TravelInsuranceComingSoonComponent

Route: /travel-insurance

🔍 Gap Analysis (Missing Pieces)

1. Notification System:

- Where does email get stored? Waitlist table?
- Confirmation email sent upon signup?
- Unsubscribe option?

2. Feature Prioritization:

- Are interest selections tracked for feature prioritization?
- Analytics on which features generate most interest?

3. Launch Timeline:

- Should page show estimated launch date/quarter?
- Or keep it vague ("Coming Soon")?

4. Content Updates:

- How will this page update as features launch?
- Progressive disclosure: show Flight when ready, keep others "Coming Soon"?

5. Social Proof:

- "Join X others waiting" counter?
- Testimonials or use cases?

Reusability Check

Component	Scope	Notes
ComingSoonPageComponent	SHARED	Template for any "Coming Soon" feature
FeaturePreviewListComponent	SHARED	Feature list preview
FeaturePreviewItemComponent	SHARED	Individual feature preview
InterestFormComponent	PAGE-SPECIFIC	Interest capture form
ConfirmationMessageComponent	SHARED	Success/confirmation display

Summary: Component Count

Category	Count
Screens	11
Atoms	18
Molecules	42
Organisms	29
Directives	2
Templates	1
Total Shared Components	92

Implementation Priority

Phase 1: Core Foundation

1. Design tokens & theming
2. Atom components (buttons, inputs, badges)
3. Auth screens (Landing, Login, Signup)
4. App shell (Header, Sidebar)

Phase 2: Main Features

1. Home Page dashboard
2. GP Consultation (waiting + active states)
3. Pharmacy (prescriptions + QR)
4. Profile (Health Locker basics)

Phase 3: Extended Features

1. Heal Well at Home (video content)
2. Specialist Consultation
3. Diagnostics
4. Profile (full features)

Phase 4: Future Features

1. Travel & Insurance (Coming Soon page)
 2. Advanced features (home collection, online ordering, etc.)
